Smart Meter Network

Sensor system

Description

Smart meter network, connected via PLC and installed on different nodes of the micro-grid.

Uses and applications

Used to analyse and manage grids, user profiles, detect unauthorised consumption or leaks, etc.

Equipment classification

Demo units.

Associated services

- Expert advice on digital technologies for Energy Management Systems.
- Expert advice on digital technologies for applications and services for Smart Cities.
- Proof of concept for technologies to support energy management systems.
- Proof of concept for smart city technologies.
- Training in open source digital technologies for energy management systems.
- Training in open source IoT technologies for Smart Cities.
